- Frameworks: Laravel, CodeIgniter, Symfony, Express.js, Koa.js, Fastify
- Frontend: React.js, Vue.js, Next.js, Nuxt.js, Tailwind CSS
- Databases: MySQL, MongoDB, PostgreSQL
- Tools: Git, GitHub, VS Code, Postman, NPM

## PROFILE SUMMARY

Full Stack Developer skilled in PHP (Laravel, CodeIgniter, Symfony), JavaScript (React.js, Vue.js, Node.js), and modern frontend tools like Tailwind CSS, Next.js, and Nuxt.js. Builds responsive, secure, and high-performance web applications.

## PROJECTS

**Twello – Affiliate Marketing Platform**

- Built with React.js, Next.js, Express.js, and Prisma
- Multi-page platform for Deals, Networks, Jobs, and Offers
- Admin panel for managing users, listings, and posts
- Secure login/signup with Google Two-Factor Authentication (2FA)
- User profiles with edit option and saved items watchlist
- Bookmark deals, offers, and jobs for later
- Comment system on network posts for engagement
- Prisma ORM for fast, scalable data handling
- Next.js SSR for SEO and performance optimization
- Fully responsive design for all devices
- Link: https://twello.co/

**Image Processing Tool**

- Developed a responsive web-based application that allows users to convert, crop, resize, and rotate images through an intuitive interface.
- Build with Vue.js, Laravel

Features:

- Convert images to JPG from multiple formats.
- Crop images by defining pixel-based rectangles.
- Resize images with custom width and height settings.
- Rotate images at 0°, 90°, 180°, or 270°.
- Real-time previews and downloadable outputs.
